Applicants' amendments to drawings and the petition under 37 C.F.R. §§1.84(a)(2) and 1.84(b)(2) for entry of color photographs filed on 9-8-06, have been fully considered. The petition for entry of color drawings has been GRANTED.

However, Examiner has discovered a discrepancy in the incorporation of SEQ ID NO for the polynucleotide sequence in figure 4. Figure 4 has now been amended to include the language "incorporating SEQ ID NO: 2" which does not sufficiently address the Sequence Rule requirements. A comparison of SEQ ID NO: 2 and the sequence in figure 4 indicate that they are not one and the same. The nucleotide sequence in figure 4 has additional number of nucleotides not seen in SEQ ID NO: 2. Applicants need to indicate where SEQ ID NO: 2 starts and ends. However, doing so would leave a stretch of nucleotides in Figure 4 without a SEQ ID NO. According to the Sequence Rules, applicants are required to provide appropriate SEQ ID NO to any polynucleotide that is 10 or more nucleotides. Therefore, Examiner suggests that applicants provide a separate SEQ ID NO: for the sequence in figure 4 and file a new sequence listing (paper and electronic versions) with a total of three sequences. Until such time, the allowance of this application will be held in abeyance.
